DM9 Dumper

MERLO

High capacity dumper

The Merlo DM is a 4-wheel drive rigid chassis high-capacity dumper, offering excellent stability and performance for the most demanding terrain.

Equipped with the renowned Merlo hydrostatic Eco Power Drive transmission forward speeds of up to 40 km/h are possible for maximum output & versatility. Fitted with Merlo portal axles offering impressive ground clearance to cope with the worst of conditions.

Bi-directional operation

Twin hydraulic tipping cylinders raise the Hardox lined tipping body to a 75-degree dump angle. A 180-degree hydraulic rotation allows for flexible discharge of the load.

ROPS & FOPS Level II equipped safety cab with dual controls and swivelling seat for bi-directional operation. Optional air conditioning available.

Excellent all-round visibility and safety, thanks to the elevated driving position.

Specification		DM9
Engine (Stage V Deutz 3.6L)	hp	100
Transmission - Hydrostatic	kmh	0 - 14/0 - 40
Height	mm	2,880
Width	mm	2,335
Length	mm	4,920
Turning Circle - Outside	mm	4,730
Ground Clearance	mm	500
Unladen Weight	kg	8,100
Maximum Load Capacity	kg	9,000
Water Volume	L	2,900
Heaped Volume ISO6483	m^3	4.9
Struck Volume	m^3	3.7
Maximum Tipping Angle		75°
